

VX Firmware Upgrade Guidance

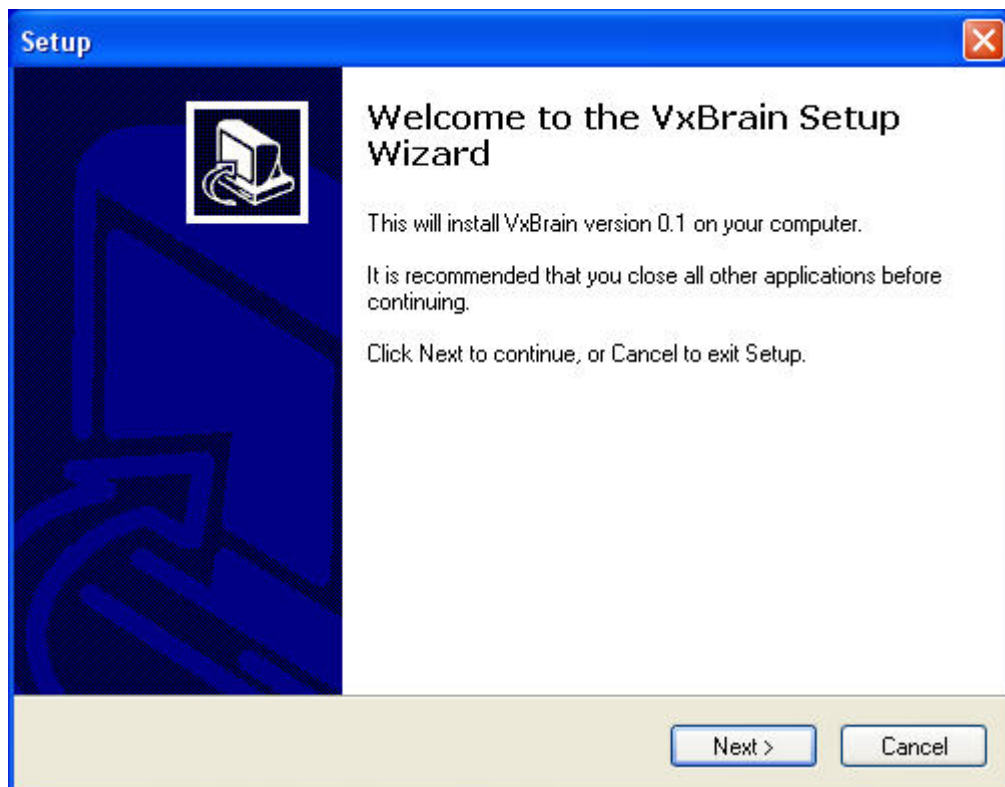

Update Note:

VX Firmware is used to improve and recompose the function of VX 5/6/7/8 keyboards.

Update process:

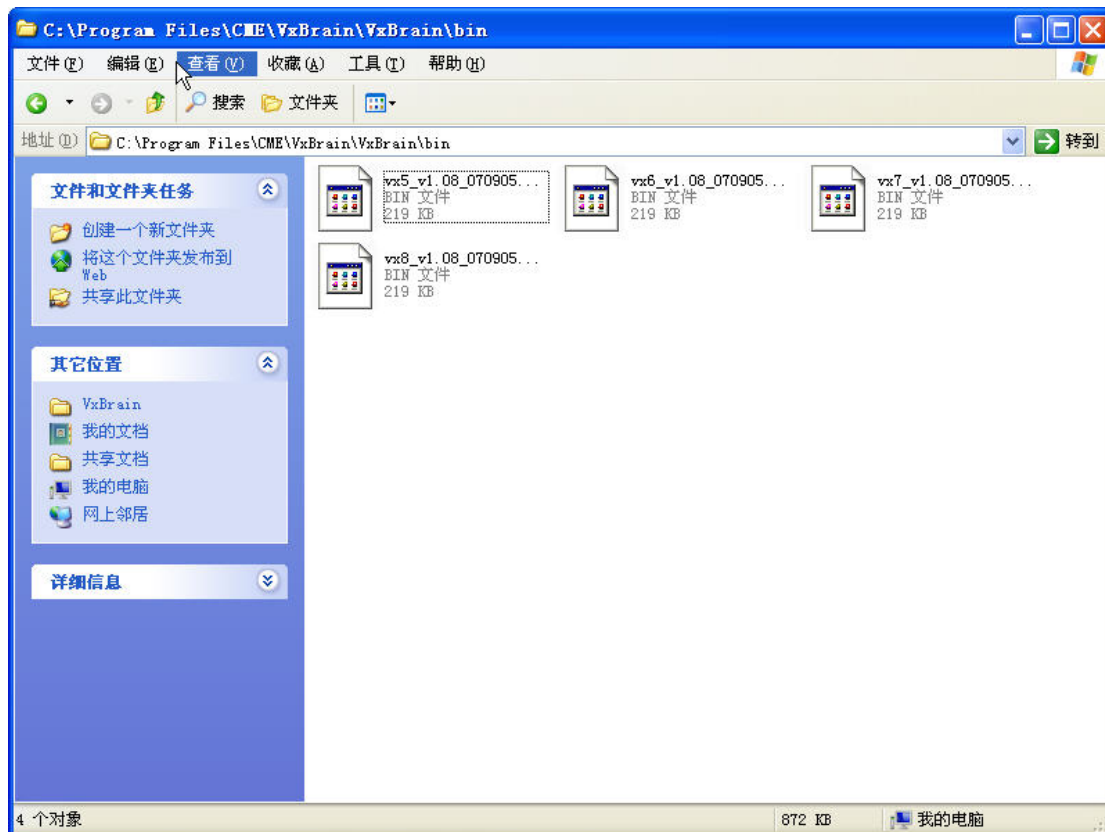

1. VX Brain Installation

- Please double click the setup file, and follow the instructions to complete the installation of VX Brain.

2. The VX Firmware Placement

- The default installation path of VX Brain is "C:\Program Files\CME\VxBrain". Here you can find the "VxBrain\bin" folder. Please copy the reciprocal ".bin" file that need to flash VX keyboards to this folder.

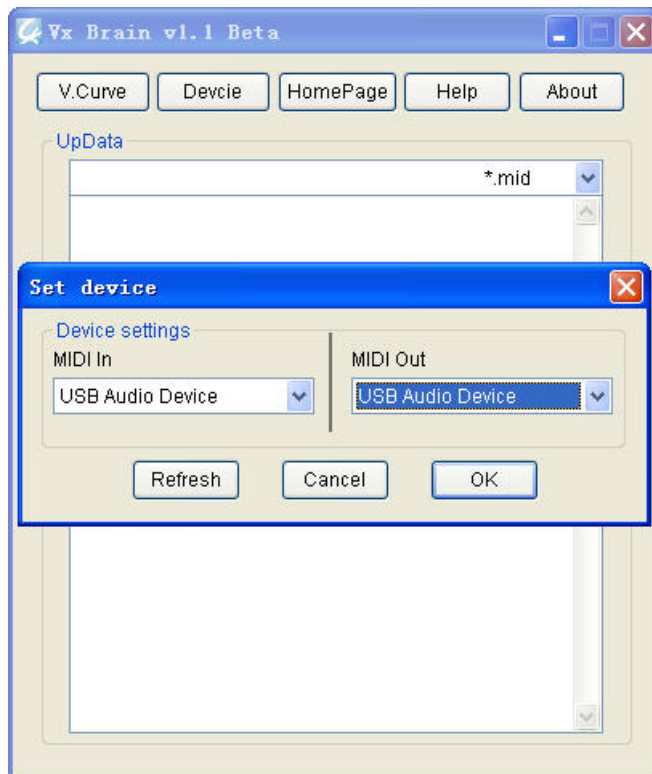

3. VX Fireware Update

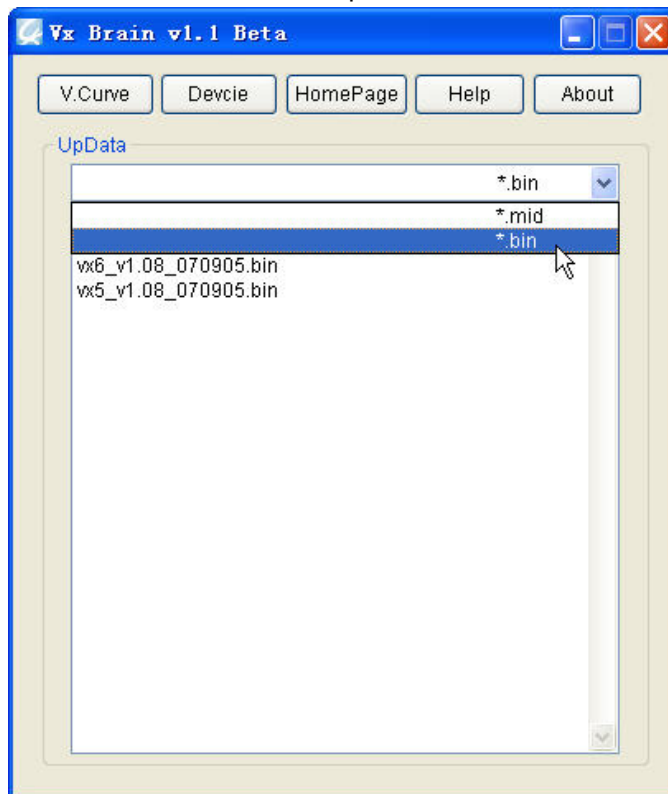

- Please use the USB cable to connect the VX keyboards to the computer, then turn on the VX.
- Please double click the icon of VX Brain to run the software.

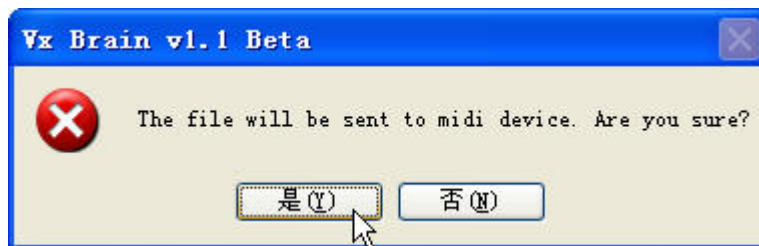

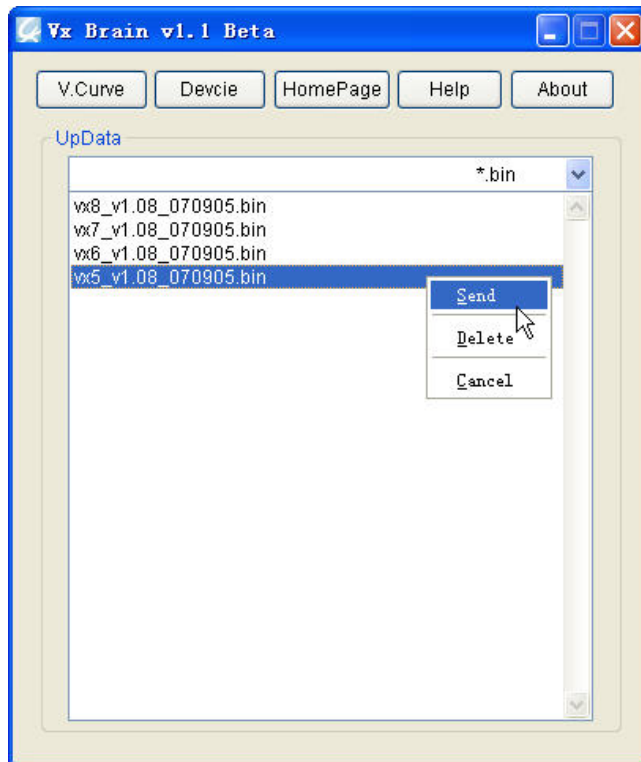

- Settings of the software: Click the "Device" button of VX Brain, then set the input and output device to "USB AUDIO DEVICE", then please click "OK".

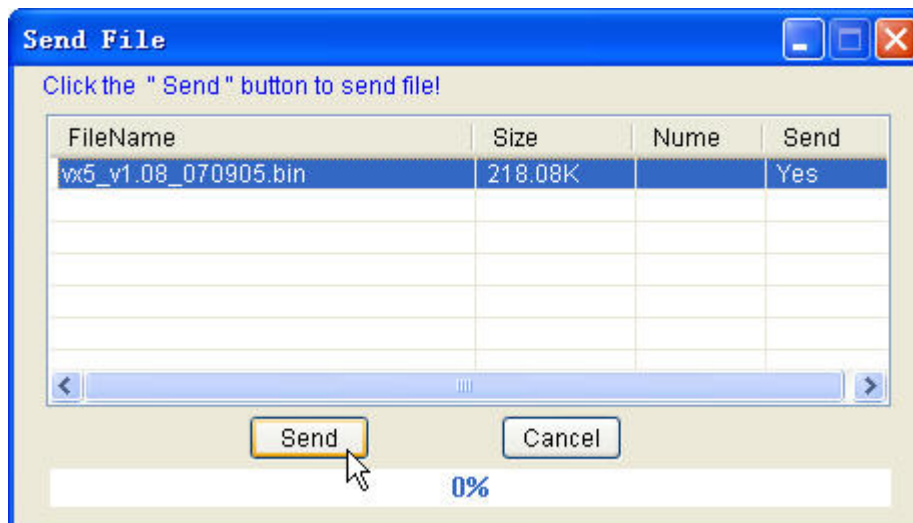

- Please choose the bin option in the list.

- Please find the firmware file that apply to flash in the file list,double click this file.Please choice "yse" option, then confirm.

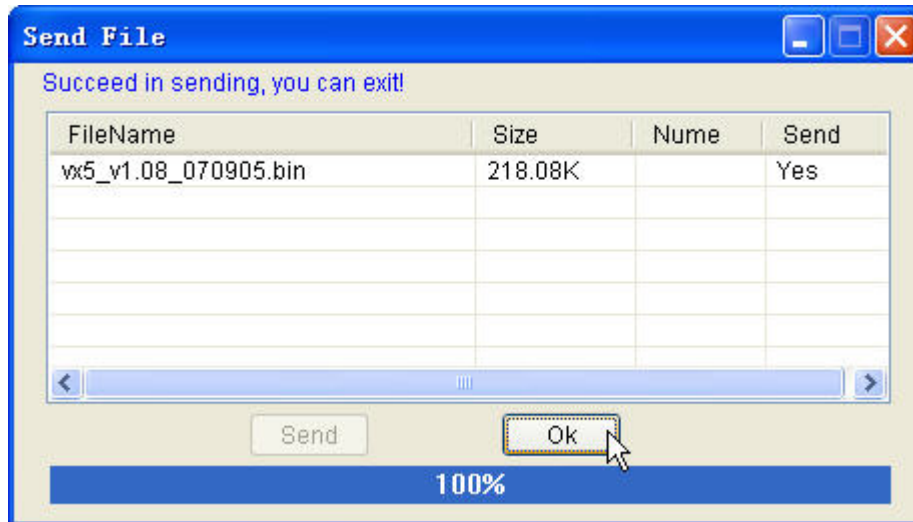

- Then there will be a new layout appear named "Send File",please click "Send".

- In this time,the flash process will begin.

PS: Please don't to operate any other program of computer and VX during the update progress!

- Click "OK" after the firmware file was transfered completely.Then VX keyboards will restart automatically.

- Please close the VX Brain and turn off the VX keyboards. Then turn on the VX keyboards while press the two "OCTACE" buttons at the same time. OK!

Ps:This operation will make all of the user setting to factory default!

4. Manual VX Update mode.

If VX can't update by VX Brain,you can use this fashion to update the VX Firmware.

- Please press UTILITY+EXPANSION buttons,then turn on the VX keyboard.

- The Led of VX will display the FlashROM message.

- Then please implement update the VX Firmware process like point "3" above.

5. Checking VX Firmware Version

- Please press the MASTER and ASSIGN buttons,then turn on the VX keyboard.

- The LED of VX will display the Firmware Version:version 1.08.

PS:When you have checked your VX Firmware version,please reboot VX keyboards.
Then VX will come into the natural Master mode.

Disposal Notice:

Please do not use the firmware file other than downloaded from the CME
website.(<http://www.cme-pro.com>)!
